

A tri-Star

Weave 5 tri*s of each color: 10 in all. Sew together with an overhand stitch. Pull the center string as shown in the sketch to just dimple the center of the tri. Sew these on the wrong side of the star.

Sew the two stars together by weaving your yarn through the loops of the hypotenuse.

Leave an opening to lightly stuff your star.

Decorate as you are inspired!

I wove this star from a man-made raffia that I bought in the dollar store. There's no reason it can't be woven of yarn or even paper or gift ribbon. Let your imagination run with this one. Go for glitter!
